

#Day 5 Assignment:

#Use filter function to filter out the elements from a list that are divisible by 3 & 5

```
li = list(range(0,100))
result = filter(lambda x: x % 3== 0, li) #divisible by 3
print('Divisble by 3:')
print(list(result))

result = filter(lambda x: x % 5 == 0, li) #divisible by 5
print('Divisble by 5:')
print(list(result))
```

Divisble by 3:

[0, 3, 6, 9, 12, 15, 18, 21, 24, 27, 30, 33, 36, 39, 42, 45, 48, 51, 54, 57, 60, 63,

Divisble by 5:

[0, 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95]
