

```
# take multiple numbers as input and print the sum  
# method 1
```

```
x=[int(i) for i in input ('Enter the values:').split()]  
sum=0  
for j in x :  
    sum += j  
print(sum)
```

```
Enter the values:10 20 30 40 50  
10  
30  
60  
100  
150
```

```
# method 2
```

```
from functools import reduce  
x=[int(i)for i in input('enter integer value:').split()]  
res=reduce(lambda a,b:a+b,x)  
print(res)
```

```
enter integer value:2 4 6 8 10  
30
```
