```python
# Day 6 Assignment
# Decorator

def mod_div (fun):
  def inner (a,b):
    if a < b :
      a, b = b, a
    return fun(a, b)
  return inner

@mod_div
def div(a, b):
  return  a // b

a= int(input ('Enter first number:'))
b= int(input ('Enter second number:'))

print(a,b)

print(div(a, b))
```

```
    Enter first number:100
    Enter second number:25
    100 25
    4
```
